### Levels 1000 (16 MCs)
- **Pass**
  - ST1131 Introduction to Statistics
  - ST1232 Statistics for Life Sciences
  - MA1101R Linear Algebra I
  - MA1506 Mathematics II
  - MA1508 Linear Algebra with Applications
  - MA1102R Calculus
  - MA1505 Mathematics I
  - MA1507 Advanced Calculus
  - MA1521 Calculus for Computing
  - CS1010/E/J/S/X Programming Methodology

This second major is **not** offered with a primary major in Statistics or Data Science and Analytics, and a minor in Statistics.

Students reading any one of the following **primary majors** with a second major in Statistics should take note of additional requirements.

**Applied Mathematics (cohort AY2013–14)** — read **three** additional MA or ST modules at level 2000 or above.

**Applied Mathematics (cohorts AY2014–15 and after)** — read **two** additional MA or ST module at level 2000 or above.

**Mathematics (cohort AY2013–14)** — read **two** additional MA or ST module at level 2000 or above.

**Mathematics (cohort AY2016–17)** — read **one** additional MA or ST module at level 2000 or above.

**Quantitative Finance (cohort AY2013–14)** — read **three** additional MA or ST modules at level 2000 or above and **one** additional ST module at level 3000 or above.

**Quantitative Finance (cohorts AY2014–15 and after)** — read **two** additional MA or ST modules at level 2000 or above.

The additional modules must belong to the elective lists of the primary major or second major and must not overlap with any other modules used to satisfy the respective primary major or second major requirements.

**Version: August 2016**
